

Friday 12<sup>th</sup> February

LO: To complete an investigation, record and present your data.

Task: Investigate a question. Then present your data in **two** different ways (tally chart, table, bar chart or pictogram).

Extra challenge: Present your data in **three or four** different ways!

You can choose any question to investigate. Here are some ideas you could use:

- How many of each colour books are on the bookshelf?
- What toys do I have in my room?
- What can I see on a walk outside?
- What birds visit my garden in an hour?
- How many repetitions of an exercise can I do in 20 seconds?  
(star jumps, push ups, bunny hops, ball bounces etc.)

You can draw the tables and charts yourself or you can use the templates to help you.
